Gross Description
The specimen is received in formalin in four parts, labeled with the patient's name.

1) Designated 'right upper parathyroid adenoma'. It consists of an oval 1.9 x 1.3 x 0.4 cm, 1.090 gram encapsulated portion of soft, tan-red tissue, which is bisected and entirely submitted in one cassette.

2) Designated 'portion of clinically normal right lower parathyroid'. It consists of a 0.004 gram portion of soft, pink-tan tissue, which is submitted in toto in one cassette.

3) Designated 'left upper parathyroid adenoma'. It consists of an oval 0.9 x 0.7 x 0.2 cm 0.156 gram portion of soft, pink-tan tissue, which is submitted in toto in one cassette.

4) Designated 'portion of clinically normal left lower parathyroid'. It consists of an oval 0.006 gram portion of soft, pink-tan tissue, which is submitted in toto in one cassette.
